WHAT DNA HAS DONE FOR WOODWORTHS

And how we found Walter's DNA without digging him up

Marvin "Woody" Woodworth

POINTS ON ONE PERSON'S DNA STRAND ARE COMPARED TO SAME POINTS ON ANOTHER PERSON'S DNA STRAND. TEST POINTS USED MAY RANGE FROM 12 POINTS (\$) TO 111 POINTS (\$\$\$\$\$) OR MORE

(See separate large poster chart)

HOW DID WE DETERMINE WALTER'S DNA WITHOUT DIGGING HIM UP?

All match perfectly at <u>67 marker level</u> meaning Their DNA is exactly Walter's DNA

DNA'S ROLE IN SORTING OUT THE WOODWORTHS OF NORTH AMERICA

NAGGING QUESTION FOR DECADES:

-- HOW DO WE WOODWORTHS CONNECT?

-- WHY CAN'T WE FIND A CONNECTION?

DNA FINDING: There are at least four main Woodworth descendant groups in the US and Canada that are not genetically related.

Immigrant	Referred to as:	DNA Testing ?	Estimated % of Woodworths
1. <u>Walter Woodworth b abt 1610 of</u> <u>Scituate</u>	"The Scituate Woodworths"	Yes	96.5
2. <u>William Woodworth, English</u> soldier of Quebec	"The Quebec Soldier Woodworths"	Yes	2
3. <u>Richard Woodworth of Dublin</u> Ireland	"The Irish Woodworths"	No	1
4. <u>George Woodworth of Cornwall,</u> <u>England</u>	"The Cornish Woodworths"	Yes	.5

DNA PROVES MYTH ABOUT WALTER'S PARENTS IS FALSE

- Claim: "Thomas Woodward and Elizabeth Tyson are the parents of Walter Woodworth, b abt 1608"
- Facts: Tom and Liz had son Henry Woodward, who would therefore supposedly be Walter's brother..
 - Henry has male descendants with documented lines
 - Henry's male descendants' DNA do not match Walter's
 - Therefore, Tom and Liz were not Walter's parents.

(Also, parish records show that Tom and Liz had five children, none of whom were named Walter).

DNA PROVES WALTER WOODWORTH AND DESCENDANTS ARE NOT GENETICALLY RELATED TO <u>ANY</u> WOODWARDS AS ONCE BELIEVED

AND THAT THERE ARE A LEAST A DOZEN GENETICALLY UNRELATED GROUPS OF WOODWARDS

THE GRAND FINALE

DNA SUGGESTS WE MAY HAVE FOUND WALTER'S PARENTS AFTER A 110 + YEAR SEARCH

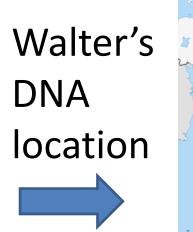

DNA SHOWS THAT WALTER WOODWORTH'S DNA WAS IN STAFFORDSHIRE, ENGLAND.

-Albert Reginald Hall matches Walter within 1 step and line came from Leek, <u>Staffordshire</u> about 1774.

- Thomas Bagnall matches within 1 step at 67 marker level and in 1800 came from <u>Staffordshire</u>.

NOTE: Their differing last names but still matching Walter means that they are descended from Walter's ancestors during a time from 1300 to 1530 when people were beginning to use hereditary surnames instead of a single name.

Staffordshire

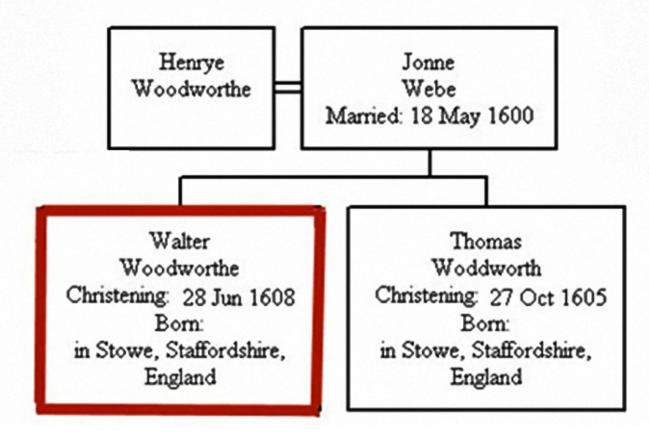

Kent shire – speculation based on "Men of Kent"

Lancashire – Thomas and Liz myth

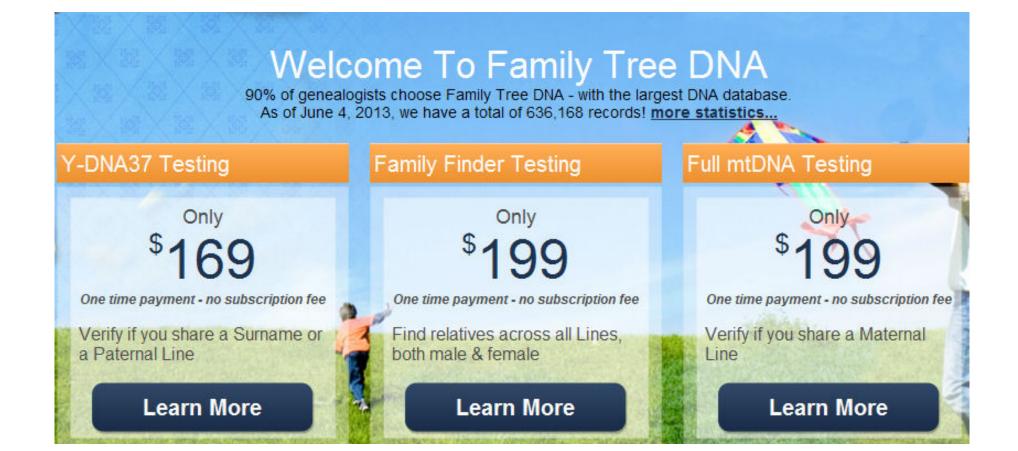

Shropshire – Quebec Woodworths

Descendants of Henrye Woodworthe

Henrye and Jonne are the best prospect so far for being Walter's parents.

IN CONCLUSION, DNA HAS

- Established Walter's DNA
- Confirms or disproves one's documentation.
 (NOTE: Cannot prove with Y-DNA alone)
- Disproved old, popular myths
- Sorted out the genetically unrelated
 Woodworths into their own respective lines
- Found Walter's parents, probably
